DEVIAN WAHYU NUGROHO

Final-year Management student concentrating in Finance at Universitas Gadjah Mada with extensive hands-on experience in statutory financial research, financial modeling, and quantitative data analytics. Demonstrates proven capability in reconciling primary statutory disclosures (IDX, OJK, Bank Indonesia), architecting data pipelines using Python and SQL, and evaluating corporate capital structures. Adept at bridging corporate governance compliance with technical analytics to deliver institutional-grade research and financial feasibility assessments.

EDUCATION BACKGROUND

Universitas Gadjah Mada — Sleman, Yogyakarta
Bachelor of Business Administration. GPA 3.45 out of 4.00 — July 2023 – July 2027 (Expected)

Relevant courses: Financial Management, Investment Analysis & Capital Markets, Quantitative Portfolio Analysis, Financial Risk Management, Corporate Finance, Business Planning, Managerial Accounting.

PROFESSIONAL EXPERIENCES

Gipsy Research — Remote, Indonesia
Equity Analyst Intern — Oct 2026 – Present

- Execute fundamental equity research, financial statement decomposition, and historical earnings quality checks across publicly listed companies on the Indonesia Stock Exchange (IDX).
- Construct detailed financial forecast models and discounted cash flow (DCF) valuation workbooks to evaluate underlying asset values and scenario-based sensitivities.

NEMOS (Early-Stage Fintech Startup) — Remote, Indonesia
Co-Founder & Business Strategy Lead — Feb 2026 – Present

- Structured an alternative revenue-based financing model designed to expand capital liquidity for underserved MSMEs through automated risk-adjusted scoring.
- Formulated multi-year financial feasibility models, unit economics, and capital allocation frameworks, validating commercial viability against domestic fintech regulations.
- Led the venture to secure Top 4 standing (Student Category) out of 800+ national submissions at the PIDI Digdaya x Bank Indonesia Hackathon 2026.
- Engineered credit assessment logic integrated into cloud data pipelines, earning technical validation at global developer hackathons.

Meridian Market Intelligence — Remote, Indonesia
Lead Financial Analyst & Systems Architect — Jan 2025 – Present

- Published 20 institutional research reports exceeding 50,000 words based 100% on audited statutory filings from IDX, OJK, and Bank Indonesia, enforcing strict data auditability.
- Engineered forensic balance sheet deconstruction models analyzing net interest margins (NIM), liquidity coverage ratios (LCR), and CASA dynamics across systemic commercial banks (KBMI 4).
- Programmed client-side interactive valuation engines, including a 1,000-iteration Stochastic DCF Monte Carlo model and Nelson-Siegel sovereign yield curve stress-testing modules.
- Deployed an automated web-based financial research terminal utilizing TypeScript, reducing data compilation latency across multi-asset publications.

Traders Family — Jakarta, Indonesia
Market Analyst Contributor — Feb 2025 – Mar 2026

- Authored weekly macro commentaries and structural capital flow reports evaluating Bank Indonesia rate trajectories, currency volatility, and global intermarket dynamics.
- Earned two consecutive performance promotions within one month based on analytical precision, research publication speed, and report engagement.

Independent Financial Research Yogyakarta, Indonesia
Quantitative Research & Risk Analyst Feb 2023 – Present

- Programmed automated Python and SQL pipelines to analyze market volatility regimes, deploying systematic risk-management models that validated capital preservation across international proprietary evaluations.

ORGANIZATIONAL EXPERIENCE

Economia Stock Market (FEB UGM Capital Market Club) Sleman, Yogyakarta
Junior Equity & Commodity Analyst Mar 2025

- Conducted fundamental equity and supply chain research on domestic agribusiness equities, evaluating policy transmission and authoring research briefs for student investment syndicates.

Shariah Economics Forum (SEF) UGM Sleman, Yogyakarta
Staff of Operational & Multimedia Division Sep 2023 – Jul 2024

- Supervised event operational records and streamlined documentation databases across organizational programs involving 50+ active members.

SELECTED RESEARCH PAPERS & QUANTITATIVE PROJECTS

OJK Institute KARISMA: MSME Digital Financing Policy Paper Jun 2026
Lead Financial & Policy Researcher

- Authored an empirical policy research paper evaluating credit accessibility, default risks, and economies of scale across digital financing ecosystems in Indonesia.
- Formulated institutional credit risk mitigation frameworks and supervisory policy recommendations aligned with OJK prudential standards.

UNESCO Youth Hackathon: AI Information Verification System Apr 2026 – Jun 2026
Strategy & Systems Developer

- Designed deployment roadmaps and stakeholder value models to counter digital disinformation in alignment with UNESCO guidelines.

Macroscope: Econometric Scenario Simulator & Risk Engine Jun 2026 – Present
Quantitative Developer

- Built an econometric engine using Python and SQL analyzing statistical correlations between macroeconomic indicators (BI-Rate, inflation, SBN 10Y yields) and equity market performance.
- Implemented Modern Portfolio Theory (MPT) algorithms to compute variance-covariance matrices, asset Betas, and historical tail-risk stress tests.

SKILLS & LANGUAGES

Financial & Advisory Skills: Financial Statement Analysis, Financial Modeling, Discounted Cash Flow (DCF), Corporate Valuation, Capital Markets Regulations (OJK/IDX), Risk Assessment, Good Corporate Governance (GCG).

Technical & Data Tools: SQL, Python (Pandas, NumPy), Advanced Microsoft Excel, TypeScript, Monte Carlo Simulation, Econometric Modeling, Git.

Languages: Indonesian (Native), English (Professional Working Proficiency).

ACHIEVEMENTS AND AWARDS

- Top 4 National Finalist, PIDI Digdaya x Bank Indonesia Hackathon (FEKDI x IFSE), 2026
- 1st Winner of National Business Model Canvas Competition at BEM FK-KMK Universitas Gadjah Mada, 2025
