PROFESSIONAL SUMMARY

Finance-focused Management student at Universitas Gadjah Mada with a strong interest in investment research, macroeconomics, and financial markets. Since 2023, I have developed my analytical capabilities through independent market research, real-market participation across multiple asset classes, and continuous publication of market insights. Beyond analysis, I build AI-assisted analytical tools that support more structured financial research and decision-making. Seeking to contribute strong analytical thinking, practical market experience, and a research-driven mindset in investment research, financial analysis, or capital market roles.

CORE SKILLS

Investment & Financial Markets: Investment Research, Market Research, Macroeconomic Analysis, Fundamental Analysis, Technical Analysis, Portfolio Analysis, Risk Management

Business & Strategy: Business Model Development, Industry & Ecosystem Analysis, Strategic Analysis

Research & Communication: Research Writing, Financial Content Development, Market Commentary

Digital & Analytical Tools: TradingView, Microsoft Excel, Notion, AI-assisted Product Development

WORK EXPERIENCE

Independent Market Research Analyst & Trader

Feb 2023 – Present

Self-Employed · Yogyakarta, Indonesia (Remote)

- Conduct independent research across forex, gold, Indonesian equities, and digital assets by integrating macroeconomic developments, monetary policy, cross-asset relationships, market sentiment, and technical analysis into structured investment theses.
- Develop market outlooks by evaluating economic releases, central bank policies, geopolitical events, and cross-asset correlations, translating research into portfolio allocation, position sizing, and risk management decisions
- Publish market research, investment commentaries, and educational content through Medium, Substack, YouTube, and TikTok while maintaining a public trading journal documenting research hypotheses, trade reviews, and continuous learning.

Market Analyst Contributor

Feb 2025 – Present

Traders Family · Freelance · Remote

- Develop and publish technical trading signals for forex and gold markets based on chart analysis, market structure, and predefined trading setups.
- Evaluate risk-to-reward opportunities and technical market conditions to support trading decisions for members of a trading education community.
- Monitor market movements and adjust trade ideas according to evolving price action and market condition

Human Resources Development

Sep 2023 – Jul 2024

Shariah Economics Forum UGM · Sleman Regency, Yogyakarta

- Assisted member development initiatives through mentoring, internal training, and organizational coordination.
- Supported member engagement activities and contributed to the implementation of human resource development programs.
- Collaborated with fellow committee members to organize internal development activities and strengthen organizational participation.

PROJECT EXPERIENCE

PEDS Terminal — Personal Financial Dashboard & Market Analytics

Apr 2026 – Present

Solo Project

- Designed and directed the AI-assisted development of a centralized market intelligence platform to streamline investment research across multiple data sources, portfolio monitoring, and market news.
- Developed analytical modules supporting portfolio management and risk analysis, including position sizing, Value-at-Risk (VaR), Kelly Criterion, and market sentiment indicators.
- Continuously refine the platform as a personal research workspace to improve market monitoring, investment decision-making, and analytical efficiency.

NEMOS — AI-Enabled Revenue-Based Financing Platform for MSMEs

Feb 2026 – Present

Group Project

- Co-conceptualized an AI-enabled investment platform connecting retail investors with verified Indonesian MSMEs through a revenue-based financing ecosystem.
- Led business model development, investment ecosystem design, user journey mapping, and market validation while collaborating with technical members to translate the concept into a functional prototype.
- Contributed to the development of a working prototype featuring investor portfolio management, MSME marketplace, AI-powered financial literacy modules, and impact tracking dashboards.

Macroscope — Macroeconomic Portfolio Scenario Simulator

Present

Solo Project

- Designed an educational simulation platform applying Modern Portfolio Theory (MPT) to analyze how Indonesian macroeconomic variables—including BI Rate, inflation, USD/IDR, and IHSG—may influence portfolio performance under different economic scenarios.
- Directed AI-assisted development of scenario comparison tools, macroeconomic correlation analysis, portfolio rebalancing simulations, and risk-performance metrics including Sharpe Ratio, Beta, volatility, and maximum drawdown.
- Built as an educational research tool to strengthen macroeconomic understanding and portfolio analysis rather than provide investment recommendations.

Hermes — Investment Research & Market Intelligence Platform

Present

Group Project

- Co-designed an AI-powered investment research platform integrating automated market news, macroeconomic indicators, technical analysis, fundamental screening, and quantitative market insights into a centralized research workspace.
- Led business and analytical workflow design by translating real-market research processes into structured AI-assisted investment analysis, collaborating closely with technical development.
- Contributed to product ideation, feature validation, and analytical framework development to improve research efficiency and support systematic investment decision-making.

EDUCATION

Universitas Gadjah Mada (UGM)

Bachelor of Management (Finance Concentration)

Jul 2023 – Present

Yogyakarta, Indonesia

- Relevant Coursework: Financial Management, Investment Analysis, Capital Markets, Risk Management
